👤 PROFILE

Hello, I'm Agugbue Ikenna Nzubechi — a results-driven Full Stack Developer with expertise in React.js, Tailwind CSS, Node.js, Express.js, Git, and MongoDB. I specialize in designing and optimizing scalable RESTful APIs, integrating secure payment solutions like Stripe, and managing efficient databases with clean, maintainable server-side logic. With a strong focus on performance and user experience, I build high-quality web applications that are secure, scalable, and tailored to drive business growth.

🧠 SKILLS

- | | | | |
|------------------------------------|-------------------------------------|-------------------------------------|--------------------------------------|
| • Nodejs | • Expressjs | • RESTFUL API Design | • MongoDB |
| • Git & GitHub | • React.js | • Tailwind CSS | • HTML5, CSS3, JavaScript (ES6+) |
| • Responsive & Mobile-First Design | • React Hooks & Component Lifecycle | • Middleware & Authentication (JWT) | • Database Schema Design |
| • Mongoose ODM | • Data Validation & Indexing | • Stripe Payment Integration | • Email Services (Gmail, Nodemailer) |
| • Third-Party API Integration | • Git & GitHub | • Postman (API Testing) | |

🧰 EXPERIENCE

Full-stack developer 2022 – present | Enugu, Nigeria
self-taught

- Designed and developed full-featured web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js).
- Built scalable, secure RESTful APIs and integrated them with dynamic front-end components.
- Implemented Stripe payment processing for eCommerce platforms, enabling secure transactions and real-time order confirmation.
- Used Tailwind CSS to build responsive, user-friendly interfaces that improved usability and customer engagement.
- Optimized database queries with MongoDB, improving performance by 30% in high-traffic applications.
- Integrated third-party services such as email notifications, cloud storage, and real-time data syncing (Firebase).
- Used Git and GitHub for version control, managing feature branches and pull requests in collaborative projects.
- Debugged and maintained production applications, ensuring 99.9% uptime and a smooth user experience.

📁 PROJECTS

Agrify 2025 – 2025
E-commerce

Agrify is a MERN stack poultry eCommerce platform that connects farmers and buyers for the sale of live birds, eggs, frozen chicken, and poultry products. It features secure authentication, seller dashboards, product listings, real-time order tracking, and integrated payments. With a clean React UI, Node.js backend, and MongoDB database, Agrify streamlines poultry sales, supports local farmers, and enhances customer convenience through a modern digital marketplace.
